Aditi Kuchi Sharma

Research Task:

Aditi Kuchi is Graduate Research Assistant in the Bioinformatics and Machine Learning Laboratory under the supervision of Dr. Tamjidul Hoque. She is currently working on the prediction of sand boils near New Orleans' levees using machine learning techniques involving Viola Jones' Haar cascades, You Only Look Once, etc. She has previously worked on the prediction of Super Secondary Structures using stacking. Her website is: https://adyteaS.github.io
